

Incontinence Care at Home: Printable Checklists

Companion to Incontinence Care at Home: The Family Caregiver's Practical Handbook by Rujal Tuladhar. Print the pages you need; the supply list goes on the inside of the cupboard door. novatoronto.com/books/incontinence-care

Sizing and fit sheet

- Name:
- Date measured:
- Waist at navel: ____ cm / in
- Hips at widest: ____ cm / in
- Use the larger number for the size chart
- Day product, brand, size: _____ Started: _____ Working? _____
- Night product, brand, size: _____ Started: _____ Working? _____
- Booster: _____
- Underpads: _____
- Notes on fit (where it leaks, what fixed it):

The five-point fit check

- 1 One finger under the leg elastic, cuffs standing up
- 2 Waist snug at or just below the navel, not rolled
- 3 Absorbent core centred where the urine goes
- 4 No gap at the back when sitting
- 5 Bottom tabs angled up, top tabs across (briefs)

Leak troubleshooter

Where it leaks	Product wetness	Likely cause	Try
Legs	Barely wet	Too big, cuffs folded, not pulled up	Re-fit; size down
Legs	Saturated	Product full	More absorbency; booster; change sooner
Back, sitting or lying	Any	Core not high at back; wrong product for lying	Tab brief, positioned high at back
Front top, man	Any	Core not forward; position	Point downward; add a guard
Clothes wet, product dry	Dry	Product not against skin	Check underwear and pad position
Everything, overnight	Saturated	Night output	Overnight product + booster; 2 a.m. change
Within an hour, repeatedly	Saturated	Medical: infection, sugar, diuretic, retention	See the doctor

Daily care log

For each day: time, wet or dry at check, changed (Y/N), bowel movement (Y/N, consistency), fluids (approx.), skin (OK / red / broken, where), notes. One line per check. A week of this answers most questions a nurse or doctor will ask.

Bladder diary (three days)

Time, drink (what, how much), toilet (small / medium / large), leak (small / medium / large, what the person was doing).

Changing kit

- Products (two sizes if testing)
- Disposable gloves
- No-rinse perineal cleanser or incontinence wipes
- Soft cloths or dry wipes
- Barrier cream (zinc for stool, dimethicone for daily)
- Underpad for the changing surface
- Disposal bags; lidded bin
- Hand sanitizer
- Spare clothes and a towel

Supply list (inside the cupboard door)

Item	Brand / size	Per day	Per month	Reorder at
Day product				10 days left
Night product				10 days left
Boosters				
Underpads (disposable)				
Underpads (washable)		2 sets		
Wipes / cleanser				
Barrier cream				
Gloves				
Bags				
Next size up, one pack				

Outing kit card

Two day products, one booster, travel wipes, travel barrier cream, two pairs of gloves, two disposal bags, one folded underpad, spare trousers and underwear, small towel, hand sanitizer, product card (brand and size), hand-held urinal if useful.

Night checklist

Overnight product, high at back; booster positioned for sleeping position; underpad on bed; waterproof protector under sheet; fluids earlier, no evening caffeine or alcohol; diuretic timing checked; double void at bedtime; commode, urinal, or lit path; planned 2 to 3 a.m. change if needed; two sets of bedding; a plan for your own sleep.

Skin check

Daily, in good light: buttocks, tailbone, hips, groin, under belly fold, heels. New redness that does not fade when pressed, broken skin, bright red rash with satellite spots, pain, smell: act today.

Call the doctor now if

Sudden new incontinence with confusion or fever; blood in urine or stool; no urine for many hours with a swollen belly; new weakness or numbness; new bowel incontinence with constipation; skin broken or not improving in three to four days.

Who to call

- Family doctor or nurse practitioner: cause, medications, referrals
- Nurse continence advisor / WOC nurse: assessment, products, training, programs
- Pelvic floor physiotherapist: exercises done right
- Home-care occupational therapist: equipment, funding, safe transfers
- Home-care nurse: skin, catheters, teaching
- Home-care case manager / Area Agency on Aging: funded hours, respite, assessments
- Pharmacist: medication review, products
- Alzheimer Society / Association: dementia support
- Social worker: money, family, decisions
